Experiences and Materials to Support Creativity

Think about different experiences and ways you can use materials to support children's creativity. Record experience or activity ideas, identify the materials needed, and highlight the ways children's curiosity, exploration, and experimentation is supported. Try to come up with at least one example for age each age group in your care (infants, toddlers, preschoolers, school-aged).

| *I will play music and offer toddlers different types of drums and drumsticks to use.*     | Drums and drumsticks (floor drums, handheld drums, drum sticks, wooden spoons) | • Explore different drumsticks and other items used to play drums  
• Use their hands to play drums  
• Choose which drum they will experiment with                                           |
