Social Scenario Activity

Use what you have learned in this lesson to promote children’s social emotional development. Read the following scenario and brainstorm how you would respond. When you are finished, compare your answers to the suggested response.

**Brian**

Brian is a 4-year-old preschooler. He has two older brothers who often take his toys from him at home and rarely let him play with his favorite superhero figures. When he is at school, he has a hard time sharing toys and materials with peers. He often takes blocks or animals to a separate area of the room and gets frustrated when other children want to play with him or the materials.
